Amendment
Attorney Docket No. E30.2H-11235-US01

Amendments To The Claims:

Claims 1-14 cancelled.

15. (Cancelled)

16. (Currently Amended) The pod illumination device according to claim ~~15~~ 30, at least one of said LED mounts comprising at least one slot.

17. (Previously Presented) The pod illumination device according to claim 16, at least one of said plurality of light emitting diodes comprising a wire traversing said at least one slot.

18. (Cancelled)

19. (Cancelled)

20. (Cancelled)

21. (Currently Amended) The pod illumination device according to claim ~~20~~ 17, said pod illumination device further comprising a plurality of lens segments, said plurality of lens segments being engaged to said base proximate to said plurality of light emitting diodes.

22. (Previously Presented) The pod illumination device according to claim 21, wherein said lens segments are constructed and arranged to blend light emitted from said plurality of light emitting diodes.

23. (Currently Amended) The pod illumination device according to claim ~~20~~ 17, said cover comprising a plurality of flutes, said flutes constructed and arranged to blend light emitted from said plurality of light emitting diodes.

24. (Previously Presented) The pod illumination device according to claim 21, said cover comprising a top, said top comprising a groove, a portion of said lens segments being engaged to said groove.

25. (Currently Amended) The pod illumination device according to claim ~~20~~ 17, said pod illumination device further comprising a pole mount, said pole mount being engaged to said base.

26. (Currently Amended) The pod illumination device according to claim ~~20~~ 17, said pod illumination device further comprising a magnet, said magnet being engaged to said base.

27. (Currently Amended) The pod illumination device according to claim ~~20~~ 17, said pod illumination device further comprising a gasket engaged to said base.

28. (Currently Amended) The pod illumination device according to claim ~~20~~ 17, said LED

mounts comprising a plurality of second light emitting diode illumination sources, said second light emitting diode illumination sources constructed and arranged to illuminate light vertically from said LED support.

29. (Cancelled)

30. (New) A pod illumination device comprising:

- a) a substantially horizontal mounting base having a plurality of LED mounts, said LED mounts extending upwardly from said base;
- b) a plurality of light emitting diodes, at least one of said plurality of light emitting diodes being constructed and arranged to engage at least one of said plurality of LED mounts;
- c) at least one first clip, said at least one first clip being constructed and arranged to engage at least one of said plurality of light emitting diodes and at least one of said plurality of LED mounts;
- d) at least one retaining clip, said at least one retaining clip being constructed and arranged to releasably engage said at least one first clip and at least one of said plurality of LED mounts;
- e) a controller in electric communication with said plurality of light emitting diodes, the controller constructed and arranged to activate said plurality of light emitting diodes to produce a light signal, said plurality of light emitting diodes receiving power from a power source; and
- f) a cover, said cover enclosing said base, said plurality of LED mounts, said at least one first clip, said at least one retaining clip, and said plurality of light emitting diodes.

31. (New) A pod illumination device comprising:

- a) a substantially horizontal mounting base having a plurality of LED mounts, said LED mounts extending upwardly from said base;
- b) a plurality of light emitting diodes, at least one of said plurality of light emitting diodes being constructed and arranged to engage at least one of said plurality of LED mounts;
- c) at least one insulator clip, said at least one insulator clip being constructed and

arranged to engage at least one of said plurality of light emitting diodes and at least one of said plurality of LED mounts;

d) at least one retaining clip, said at least one retaining clip being constructed and arranged to releasably engage said at least one insulator clip and at least one of said plurality of LED mounts;

e) a controller in electric communication with said plurality of light emitting diodes, the controller constructed and arranged to activate said plurality of light emitting diodes to produce a light signal, said plurality of light emitting diodes receiving power from a power source; and

f) a cover, said cover enclosing said base, said plurality of LED mounts, said at least one insulator clip, said at least one retaining clip, and said plurality of light emitting diodes.
